**Direzione Ricerca e  
Sistema Bibliotecario di Ateneo**

**6**  
INCONTRI  
PER CONOSCERE  
**NOBEL**  
2014

Premio Nobel per la **FISICA** a Isamu Akasaki, Hiroshi Amano e Shuji Nakamura per **"l'invenzione di diodi ad emissioni di luce blu efficienti che hanno consentito sorgenti di luce bianca luminose e a risparmio energetico"**

18 novembre 2014

Relatore: *Lorenzo Pavesi*, Dipartimento di Fisica

### **Breve bibliografia sui temi dell' incontro**

**Khanna, V. K.**, *Fundamentals of solid state lighting: LEDs, OLEDs, and their application in illumination and displays*, CRC Press, 2014

**T.-Y. Seong, J. Han, H. Amano, H. Morkoc** (a cura di), *III-Nitride based light emitting diodes and applications*, Springer, 2013

**Sze, S.M., Lee, M.K.**, *Semiconductor devices : physics and technology* Wiley, c2013

**Deen, M. J., Basu, P.K.**, *Silicon photonics : fundamentals and devices*, Wiley, 2012

**Paskova T.**, *Nitrides with nonpolar surfaces : growth, properties, and devices*, Wiley, 2008

**Reed, G.** *Silicon photonics : the state of the art*, Wiley, c2008

**Yoo, C. S.**, *Semiconductor manufacturing technology*, World scientific, c2008

**Takahashi, K. , Yoshikawa, A., Sandhu, A.**, *Wide bandgap semiconductors : fundamental properties and modern photonic and electronic devices* Springer 2007

**Schwartz, G. C., Srikrishnan, K. V.** (a cura di), *Handbook of semiconductor interconnection technology*, CRC press, 2006

**Spieler, H.**, *Semiconductor detector systems*, Oxford university press, 2005
